

Navigating Compliance in 2025

The Storage Side of Compliance Made Easy by FAST LTA.

Compliance in IT is more important than ever. Regulations such as **NIS2**, **DORA**, and **GDPR** impose strict requirements on data protection, availability, and integrity. Organizations struggle with the question: how can I meet these requirements easily without complex and costly solutions?

FAST LTA provides secure and efficient storage solutions that simplify compliance. Our Silent Bricks and Silent Cubes help organizations protect their data, minimize risks, and effortlessly pass audits. Below is an overview of the key regulations and how our solutions contribute to compliance.

NIS2: Mandatory Cybersecurity and Risk Management

[What is NIS2?](#)

The NIS2 directive imposes stricter cybersecurity and risk management requirements for organizations in critical sectors. Data security, availability and reporting play a crucial role in this directive.

[Impact on storage](#)

- **Highly secure backups** and **data loss prevention** are mandatory.
- Data must be **protected against ransomware** and **cyberattacks**.
- **Logging** and **monitoring** are essential for compliance.

[How FAST LTA contributes to NIS2 compliance](#)

- **Silent Bricks:** Immutable backups and physical airgap prevent data loss from cyberattacks and contribute to rapid recovery.
- **Silent Cubes:** Secure, long-term archiving with hardware WORM technology, ensuring data remains unchanged and accessible under any circumstances.

Silent Brick System

DORA: Digital Resilience for the Financial Sector

What is DORA?

The Digital Operational Resilience Act (DORA) requires financial institutions to protect their IT infrastructure from incidents and disruptions.

Impact on storage

- **Continuity** and **fast recovery capabilities** are required.
- **Incident reporting** and **audit trails** must be ensured.
- Strict requirements for **data integrity** and **access management**.

How FAST LTA contributes to DORA compliance

- **Silent Bricks:** Immutable backups and physical airgap ensure datasecurity and contribute to rapid recovery.
- **Silent Cubes:** Reliable and secure, hardware immutable storage for long-term archiving without any data loss or alteration. Certified by KPMG for audit-proof archiving, eliminating the need for external auditing.

Silent Cube System

GDPR: Protection and Privacy of Personal Data

What is GDPR?

The General Data Protection Regulation (GDPR) sets strict requirements for the storage, processing, and protection of personal data within the EU.

Impact on storage

- Data must be **stored securely** and potentially encrypted.
- Only **authorized access** is allowed.
- Data **retention** and **deletion** must be properly managed.

How FAST LTA contributes to GDPR compliance

- **Silent Bricks:** Immutable backups and physical airgap ensure datasecurity and allow for advanced encryption.
- **Silent Cubes:** Certified hardware WORM archiving for data retention and compliance with retention policies.
